

## Candy

Bibi likes candy so much. One day, she go to a supermarket that have N different types of candy. She wants to buy the candy as many as possible. She has M dollar in her pocket right now and she ask you to help her to count the number of candy she can buy as many as possible.

#### Format Input

Input start with T, the number of test cases. For each test cases, there will be 2 integers N and M. In the second line there will be N integers, describing the price of one i-th candy. There will be unlimited supply of each type of candy.

### Format Output

Output starts with "Case #X:", where X is the test case number starting at 1, then followed by an integers, the maximum number of candy that Bibi can buy.

#### Constraints

- $1 \le T \le 100$
- $1 \le N \le 10000$
- $1 < M < 10^9$
- It is guaranteed the price will be between 1 and  $10^6$ .

# Candy

Bibi sangat amat menyukai permen. Suatu hari, Bibi pergi ke sebuah supermarket yang mempunyai N tipe permen berbeda. Bibi ingin membeli permen sebanyak mungkin. Bibi memiliki M dollar di dalam dompetnya dan meminta bantuan anda untuk menghitung berapa banyak permen maksimal yang bisa dibeli.

#### Format Input

Input dimulai dari T, jumlah kasus uji. Di setiap kasus uji akan terdapat 2 bilangan bulat positif N dan M. Baris kedua terdapat N bilangan bulat positif yang merupakan harga dari permen ke-i. Dijamin setiap permen memiliki jumlah yang tidak terbatas.

### Format Output

Output dimulai dengan "Case #X: ", di mana X adalah nomor test case mulai dari 1, kemudian diikuti dengan sebuah bilangan bulat yang merupakan jumlah permen terbanyak yang bisa dibeli oleh Bibi.

#### Constraints

- 1 < T < 100
- $1 \le N \le 10000$
- $1 < M < 10^9$
- Dijamin setiap harga permen berkisar diantara 1 dan 10<sup>6</sup>.
