

# Clarify

Bibi was flooded with clarification requests after giving her friends the problems. Bibi make a special rule to minimize the effort answering clarification request. Bibi will answer a clarification if her friends has not solved the problem when Bibi viewed the clarification request. Help Bibi to calculate how many clarification request did she answered considering her rule.

#### Format Input

The first line of the input consists of an integer N, the number of clarifications. N lines follows, each lines consists of three integers  $tc_i$ ,  $ts_i$  and  $tv_i$ , the time when  $i^{th}$  clarification is sent, the time when  $i^{th}$  solved the problem and the time when  $i^{th}$  clarification is viewed

## Format Output

Print the number of clarifications Bibi answered.

#### Constraints

- $1 \le N \le 100,000$
- $0 \le tc_i \le tv_i \le 300$
- $0 < ts_i < 300$

## Sample Input (standard input)

## Sample Output (standard output)

# Clarify

Bibi menerima banyak permintaan klarifikasi atas soal yang ia buat untuk teman-temannya. Untuk mempermudah kerja, Bibi membuat aturan khusus dalam menjawab klarifikasi. Bibi hanya akan menjawab suatu klarifikasi apabila disaat Bibi melihat klarifikasi tersebut, teman Bibi belum menjawab soal tersebut. Bantulah Bibi dengan memberi tahu berapa banyak permintaan klarifikasi yang dijawab oleh Bibi berdasarkan aturan yang ia buat.

### Format Input

Baris pertama dari input merupakan bilangan bulat positif N dimana N merupakan jumlah dari permintaan klarifikasi. N baris berikutnya berisikan 3 bilangan bulat positif  $tc_i$ ,  $ts_i$  dan  $tv_i$  dimana  $tc_i$  merupakan waktu klarifikasi ke-i dikirim,  $ts_i$  merupakan waktu soal ke-i terjawab dan  $tv_i$  waktu Bibi melihat permintaan klarifikasi ke-i.

## Format Output

Output merupakan berapa banyak permintaan klarifikasi yang dijawab oleh Bibi.

#### Constraints

- 1 < N < 100,000
- $0 \le tc_i \le tv_i \le 300$
- $0 \le t s_i \le 300$
